Projects

Hockey Team Manager | Personal
- Developed a team CRUD management system which stores information of current hockey players on the N.C. Warriors Hockey Team. Replacing an excel document, the program allows a team manager to add new players and update existing players. To include separating players based on current league team. Created using Spring Boot, MVC, and Security. As well as with Thymeleaf, Bootstrap and MySQL

North Carolina Warriors Hockey Website | Personal & Volunteering Project
- Currently redesigning the northcarolinawarriors.com website using the React and Spring MVC framework. The new website will provide better interaction for users. As well as allowing current players to have login access using Spring Security. Displaying player and team statistics using data pulled from the Sports Engine API using REST standards via Spring. Progress shots available on GitHub page

PoliHeel | Personal Project
- Created a website using React and Google Firebase that provides users a list of their respected U.S. federal and state senators and representatives, based off their location after sign up. Using Google Civic and ProPublica API, the user's congressional members information such as voting percentage, political leaning, and contact information are displayed

Achievements and Awards

- Awarded the Navy and Marine Corps Achievement Medal for superior performance of duties while serving as videography chief, Combat Camera Section at the School of Infantry – East, Camp Lejeune N.C.
- Achieved the Wake Tech academic standing Dean's List

Professional Experience

Vanguard Cleaning Systems of Raleigh, *Raleigh, N.C.*   May 2016 - July 2020
